

New Hire Onboarding Policy

Section 1

New hires complete a 2-week onboarding program covering company systems, security training, and role-specific shadowing. IT equipment must be provisioned at least 3 business days before the start date.

Section 2

Every new hire is assigned a buddy from a different team for the first 30 days to help with informal questions and cultural onboarding, separate from their direct manager.

Section 3

The 90-day probationary period includes a formal check-in at day 30, day 60, and day 90, each documented in the HR system with manager and employee sign-off.

Section 4

New hires must complete mandatory compliance training, including data privacy and code of conduct modules, within the first 5 business days of employment.
