

IT Security Policy

Section 1

All employee passwords must be at least 14 characters long and rotated every 90 days. Multi-factor authentication is mandatory for all systems that store customer data.

Section 2

Laptops must have full-disk encryption enabled before being issued. Any lost or stolen device must be reported to IT Security within 1 hour of discovery.

Section 3

Access to production databases requires a signed access request approved by the data owner and expires automatically after 30 days unless renewed.

Section 4

Phishing simulation tests are run quarterly. Employees who fail 2 consecutive simulations are required to complete a mandatory security training module within 5 business days.
